

COMPUTER LAB

Aims

- To provide basic and advanced computer knowledge to students.
 - To enhance digital literacy and technical skills required in modern healthcare and education.
 - To support academic learning, research, and data management.
 - To promote the use of information technology in nursing practice and administration.
-

Objectives

- To train students in fundamental computer operations (MS Word, Excel, PowerPoint, Internet use).
 - To enable students to access online educational resources, e-books, and journals.
 - To develop skills in documentation, presentation, and data analysis.
 - To support research activities by teaching data entry, analysis, and report preparation.
 - To improve communication skills through digital platforms (email, online meetings, etc.).
 - To ensure students understand ethical and safe use of computers and the internet.
-

Information / Facilities Available

- Well-equipped computer lab with adequate number of computers.
 - High-speed internet connectivity for academic and research purposes.
 - Installed software such as MS Office, statistical tools, and educational programs.
 - Printer and scanning facilities.
 - LCD projector for teaching and presentations.
 - Regular maintenance and technical support.
 - Supervision by qualified computer instructor/lab assistant.
-

Rules and Regulations

- Students must maintain discipline and silence in the lab.
 - Use of computers only for academic purposes is allowed.
 - No installation of unauthorized software or external devices.
 - Food and drinks are strictly prohibited.
 - Proper handling of equipment is mandatory.
 - Follow allotted time schedule for lab usage.
-

Conclusion

The Computer Lab plays a vital role in developing technical competency among students, enabling them to meet modern educational and healthcare demands efficiently.
